

Spring De-Winterizing Checklist for Your Camper

Step 1: Exterior Inspection

- ☐ Inspect roof seams, vents, and trim for cracks or separation
- ☐ Check window and door seals for wear or mildew
- ☐ Inflate tires and inspect for cracks, wear, or aging
- ☐ Examine jacks, frame, and hardware for rust or leaks
- ☐ Rinse off road grime and salt buildup

Step 2: Water System Revival

- ☐ Drain antifreeze and flush lines
- ☐ Reconnect and flush the water heater
- ☐ Sanitize with diluted bleach and rinse thoroughly
- ☐ Check for leaks and reinstall filters
- ☐ Clean pump strainer (if equipped)

Step 3: Electrical Systems & Battery Checks

- ☐ Reinstall and check batteries for charge, corrosion, and fluid levels
- ☐ Test 12V lights, fans, and all 120V outlets
- ☐ Confirm shore power and converter function
- ☐ Inspect solar panel and charge controller (if equipped)
- ☐ Test detectors and replace batteries
- ☐ Check hidden wiring for damage or loose connections

Step 4: Systems Check & Galley Reset

- ☐ Leak-test propane fittings and inspect hoses
- ☐ Clean and test fridge on electric and propane
- ☐ Clear freezer drain line (if applicable)
- ☐ Restock pantry, cookware, bedding, and gear
- ☐ Refresh emergency kit and confirm documents

Step 5: Interior & Final Systems Check

- ☐ Air out cabin and remove moisture packs
- ☐ Clean surfaces, vacuum, and check for mildew

- ☐ Test and lubricate windows, vents, and latches
- ☐ Test detectors and replace backup batteries
- ☐ Verify extinguisher and restock first aid kit
- ☐ Inflate and inspect tires
- ☐ Test exterior lights
- ☐ Tighten tie-downs and mounting hardware
- ☐ Check vehicle fluids, tires, and camper connection
